

Open Source Live!

I HEAR and I FORGET. I SEE and I REMEMBER. I DO and I UNDERSTAND.

Attendee Feedback:

"It's a great course to attend and I recommend it to lead/architects/individual contractors before they start any new project and decide on technologies"

-Srinivas Peri, Adobe

"We have plans to implement JSF/Spring/Hibernate in our future projects, and attending the Open Source Live! practicum has given us more insights in those topics."

-Parda Akalamkm, TransAmerica

Instructor Bio:

- **Kito Mann, developer**, enterprise architect, author, Java Server Faces in Action
- **Sang Shin**, is a Technical Architect and a Java Evangelist at Sun Microsystems
- **Bill Dudney**, open source advocate and a contributor to the Apache Geronimo project, author of three books

Kito D. Mann is editor-in-chief of JSF Central (www.jsfcentral.com) and the author of **JavaServer Faces in Action** (Manning). He is a member of several Java Community Process expert groups (including JSF and Portlets), and an internationally recognized speaker. Kito is also the Principal Consultant at Virtua, Inc., specializing in enterprise application architecture, training, development, mentoring, and JSF product strategy. He holds a BA in Computer Science from Johns Hopkins University.

Bill Dudney is long time open source advocate, Bill has been actively involved in fostering open source community development since 1990. Bill is a **contributor to the Apache Geronimo project** and works with clients to integrate Geronimo into their environments. Bill is also a **committer on the Apache Software Foundation's MyFaces project** (myfaces.apache.org) and has written a book entitled Eclipse Live, which focuses on the open source Eclipse platform (eclipse.org). In addition to his involvement in open source, Bill has worked with Java development for ten years, enterprise computing for fifteen, and has built software for NASA's space shuttle program. Bill is a frequent speaker at conferences such as ApacheCon, JA00, Colorado Software Summit, and many Java User Groups. He has co-authored several books focusing on open source, **J2EE AntiPatterns**, **Jakarta Pitfalls**, and **Mastering JavaServerFaces** all three published by John Wiley & Sons

Sang Shin is presently working as a Java(tm) Technology Architect, Consultant, and **Evangelist in Sun Microsystems**. He frequently gives talks on various Java technologies such as Java EE (formerly J2EE), Java SE, Java ME, and Web application frameworks and Web services technologies to worldwide developer audience. He has given technical talks to about 30,000 Java developers in fifty countries. Whenever he finds time, he also teaches one of the three software engineering courses ("J2EE Programming", "Web Services programming", "XML") in Brandeis university in Massachusetts. He currently teaches "J2EE programming (with Passion!)" and "18-week Ajax programming (with Passion!)" online courses. The "18-week Ajax programming" course covers all the Ajax technologies including Dojo toolkit, Google Web Toolkit, Direct Web Remoting, jMaki, JavaServer Faces, JSON, and Phobos His online courses has more than 13,000 people enrolled from round the world.
